**DRI-TOUCH® PLUS IRP3 Rust Preventive**  
Operating Instructions

**PRODUCT DESCRIPTION**

DRI-TOUCH® PLUS rust preventive is a solvent-based, water displacing corrosion inhibitor for all metal surfaces. Supplied as a thin-bodied liquid, it rapidly penetrates and displaces moisture from metal surfaces and forms a dry to touch film that resists atmospheric humidity and provides long term protection for parts in storage or in service. Protective film is self-healing but has a semi-solid consistency to resist draining off the surface or wicking off into packaging materials. Contains no silicone or wax. Harmless to plastics, paints, synthetic rubbers.

**RECOMMENDED USES**

The DRI-TOUCH® PLUS liquid can be applied to wet or dry parts. Excellent as a corrosion preventative over black conversion coatings, and phosphates because it seals out corrosion and enhances the depth of color. Can also be used on uncoated metal surfaces for long term storage. Non-conductive film dries and lubricates without interfering with proper operation. Compatible with most lubricants, hydraulic oil, cutting oils.

**APPLICATION**

Dipping, brushing or conventional low pressure paint spray equipment. Dries in 10-30 minutes at ambient temperatures.

**PHYSICAL PROPERTIES**

Appearance	Amber Liquid, mild solvent odor
Flash Point T.O.C.	131°F
Approximate Coverage	1600 Square Feet Per Gallon
Film Thickness	Approximately 0.10mil

## **PROTECTIVE PROPERTIES**

Humidity Test (ASTM D-1748)	600 Hours Minimum
Salt Spray Test (ASTM B-117)	96 Hours Minimum
Water Displacement	Meets Mil-C-16173E, Grade 3
Stain Test (non-ferrous alloys)	Meets Mil-C-22235A

## **REMOVAL**

Solvent wash or heated alkaline detergent cleaners.

## **PACKAGING**

5 gallon pails and 55 gallon non-returnable drums. Keep container closed during storage to prevent solvent loss.

***Before Using This Product – Please Read, Understand and Follow all the Precautions shown on the Product Label and on the Safety Data Sheet.***
